

# ***Monnal T60***

Touch and Breathe

# Close to the emergency

**Monnal T60®** has been designed for mobile medical intervention in all intensive care environments, both inside and outside of a hospital setting. It puts into the hands of transport medical teams the highest standards of ventilation for critical patients, adults and children.

**Monnal T60** is the companion for medical care teams to increase their effectiveness even more:

- in land and air mobile units, helicopter, plane, long distance ambulance transport
- during intra-hospital transport
- in emergency and trauma rooms
- in post-operative recovery rooms and intensive care units.

**Monnal T60** easily adapts to all environments requiring mobile intensive care.

## Air transport

- air transport certification (standard EN 13718 and RTCA DO-160F)
- 20G resistance
- automatic compensation for atmospheric pressure changes
- adjustable screen brightness
- highly visible alarms

Ergonomic grip and carry handle

# T60

mobility

**Monnal T60** meets the demands of situations that are always unique and in difficult or extreme conditions.

## Monnal T60 advantages

- + **light and compact:** 3,7 kg
- + **autonomous in air and electricity:** 5 hours extendable with interchangeable batteries for continuity of operations and increased transportation options
- + **robust and resistant over time:** protection of connections and integration of expiratory assembly
- + **integrated accessories:** holder and protection systems for optimum configuration and movement of the patient:
  - wall-mounted charging station
  - carrying case
  - intra-hospital universal support
  - rolle stand

monnal

# Close to medical teams

**Monnal T60** is the solution **for fast and reliable access to care**. It provides effective respiratory support in the shortest possible time. Very intuitive to use, the **Monnal T60** allows medical teams to quickly familiarize themselves with the ventilator and focus on vital treatment of the patient.

## Monnal T60 advantages

- + **grouped and localized connectivity** for simple preparation of the ventilator
- + case designed for the **pre-connection of cables** and patient circuit
- + **automatic emergency modes** by simple adjustment of weight (IBW\*) for a quick and safe start of the ventilation

speed

## Intuitive use

- large touch screen
- unique way of intuitive use: select, adjust, confirm
- contextual menu

Grouped and localized connectivity

\* Ideal Body Weight: weight predicted by patient's height

# Close to the patient

vision

Accurate, complete and accessible monitoring in the first moments of patient care is crucial for planning, monitoring, and adapting care.

With its comprehensive monitoring capabilities, **Monnal T60** ensures **safe ventilation throughout patient transport**.

## Monnal T60 advantages

- + **large color screen** facilitating the readability of information in all conditions: adjustable brightness, high contrast display, 180-degree swivel screen
- + **unique monitoring zone** to follow all patient information
- + **monitoring screen** function with extended time curves
- + large **alarm lights** that are easily identifiable in all environments and can be disabled if necessary

## Ventilation safety

- monitoring of exhaled CO<sub>2</sub> (optional) to be assured of correct patient intubation and continuously monitor ventilation efficiency (mainstream technology)
- automatic monitoring of the Plateau Pressure for lung protection of the patient

Visible alarm lights

# Close to breathing

**Monnal T60** provides high quality care for the successful treatment of patients. Medical teams can effectively adapt the treatment to meet the needs of their patients: high performance of **invasive and non-invasive ventilation, automatic transport ventilation**; volume and pressure modes, CPAP and pressure support modes.

**Monnal T60** integrates the Monnal technology platform which facilitates a rapid transition from emergency to intensive care.

## Monnal T60 advantages

- + sensitive triggers to ensure **patient comfort** and acceptance of the non-invasive ventilation
- + automatic **leak detection and compensation**
- + wide range of **inspiratory oxygen fractions**
- + **adjustable apnea ventilation**

## Monnal T60 turbine: patented technology

- peak flow of 230 L/min for effective respiratory support in NIV
- rapid pressurization to meet respiratory demand of the patient at best
- silent operation to minimize ambient noise (48 dBA at 1 m)

efficiency

Automatic emergency modes
